

**CLAIM AMENDMENTS**

1. (Currently Amended) An article enabling a spray bottle to be suspended from an ironing board or other surface, the spray bottle including a neck portion to which a manually operated spray head attaches, the spray head having an upper extent and a forward, manually operated trigger, the article comprising:

a shaped body having a lower end with an aperture configured for coupling to a neck of a spray bottle and [[an]] a side member extending upwardly from the lower end, the side member terminating in a bent upper lip located directly above the aperture for hanging a spray bottle coupled thereto.

2. (Canceled)

3. (Currently Amended) The article of claim 1, wherein the [[body]] side member includes a curved back surface.

4. (Canceled)

5. (Original) The article of claim 1, wherein the upper lip includes a surface or feature to enhance friction or holding capability.
